Dr.Johannes Herrmann
Senior Lecturer
Curtin University , Australia
Kent Street , Bentley , Perth
Western Australia , 6102

Dear Dr.Johannes Herrmann:

I'm currently reading for a BSc in Software Engineering degree at SLIIT along with Curtin University Australia. I have completed a course on Information and Communication Technology obtaining a distinction pass and completed a diploma in Information Technology with E-Commerce in 2014 at ESOF.

As a Software Engineering student I developed a web application and a mobile application for a Banking System , web application for a Vehicle and Fuel Filling Station and a desktop application for a Hotel Management System. [Group Work]

I have gained knowledge on many programming languages ; Java , C , C++ , Html , Css and slightly Python. I'm well experienced with softwares like Ms Office , Android , Netbeans , Eclipse. I like to work as a team and I'm hard working , creative , enthusiastic , patient , reliable and trustworthy.

In my third year I chose Property Management System as my project. And Maintenance Management is the function I'm responsible for. This function is mainly focused on the condition of the properties. System keeps a track of cleaning processes and assigns workers to fix the problems regarding the properties.

Thank You for your valuable time and consideration.

Sincerely,

poornami wijekoon
